About Me

As a final year student pursuing a BSc (Hons) degree in software engineering at Sri Lanka Technology Campus, my objective is to secure a position in Frontend Developing and Graphic Design. I am enthusiastic about combining my technical expertise in software engineering with my passion for creativity to create visually appealing and user-centric designs. I am eager to apply my knowledge and skills to contribute to the design process, collaborate with cross-functional teams, and deliver exceptional user experiences.

Education

BSc (Hons) in Information Technology in Software Engineering Sri Lanka Technological Campus Padukka (2020 - 2024) **CGPA – 2.86**

Software Architecture
Programming Concept
Object Oriented Programming
Business Analysis
Arts for Technology, etc

Diploma in Psychology & Counselling in IMBS (Institute of Management & Business Studies) Green Campus (2021-2022) **CGPA – 3.360**

Skills

- Problem solving
- Analytical skills
- Time management
- JavaScript
- HTML / CSS
- Java
- Python
- VS code
- Android Studio
- Adobe Illustrator
- Adobe Photoshop
- React / Node
- Figma

Professional Training and Qualification

Uva Wellassa University
Certificate Course In English For School Leavers

University Of Moratuwa
Online learning Programme in Web Designing for Beginners

Sri Lanka Technological Campus Padukka
Road to CodMania'21: Python Fundamentals & Algorithmic Programming IEEE Computer Society

COURSE

Cloud Computing Applications, Part 1: Cloud Systems and Infrastructure

National Youth Services Council Badulla

Certificate Course in Computer Application Assistant

Academic Project

Create a messaging mobile app using flutter and dart – Technology Challenge Competition (2022) - <https://github.com/nixx49/tweetvio.git>

This project of Team Mustangs is conducted in order to build A Text Based Chat. Application. The application is required to have the features, Private Messaging, Public Rooms, Group Chatting, User Management Reporting.

The name of the application that we will be creating in this project is “Tweetvio”

Student Management System for SLTC Research University

This is my final year project In our university students And 93.2% prefer to maintain their data continuously and get predictions. Accordingly, there has been a strong need for a web-based system that can enter all the data of the students, review it and predict the progress of the students. We use React, Node to develop this.

ECommerce-System - <https://github.com/rash0956/ECommerce-System.git>

This website was created by me for the final project of web development course, which is an open online course of the University of Moratuwa, under the "Trainee- Full Stack Developer" program. HTML, CSS, and Javascript languages were used to create it.

SOAP - <https://github.com/rash0956/Soap.git>

This SOAP-API was created to convert between different currencies. Basically converts between 50+ different currencies. JSON files are used throughout the entire PHP-based project to store data.

Extra-Curricular Activity

- SLTC IEEE Gisla 2021 – Design Team
- SLTC Leo Mindset 2021 – Organizing Committee Design Head
